MEDICAL PAYMENT SOLUTIONS PARTNERS WITH MY PAYMENT NETWORK TO IMPROVE PATIENT COLLECTIONS

OKLAHOMA CITY, OK, July 15, 2008 - Medical Payments Solutions is pleased to introduce **MedPay**, an exciting new online service that reduces the cost of collecting patient payments and improves collect rates for healthcare providers such as physician offices, lab and imaging centers.

Recognizing the declining reimbursement for healthcare providers and an increase in patient co-pays and deductibles, Medical Payments Solutions created MedPay, an easy-to-use, cost effective solution to a growing problem for healthcare providers. MedPay is a secure, hosted application specifically designed to allow physicians and healthcare facilities to electronically collect the *patient portion* of medical services. MedPay offers online bill pay, automated and recurring payments.

"We saw that while many healthcare providers had electronic payment solutions in place to receive payments from the major payors, most were ill-equipped to manage their patient payments. In addition, because most groups utilize paper invoice collections, the rising number of patient payments has created a rising cost most groups cannot bear", explained Derek Doss, president Medical Payment Solutions.

David Dunaway, president and CEO of My Payment Network added, "We are excited to be working with Medical Payment Solutions. We specifically look for the "forgotten markets" of business to consumer payments that are buried in costly paper. Medical Payments Solutions has the industry expertise to serve this segment of medical payments with a compelling solution."
